Where the plant is unfolded for you

Manufacturing quality is at the heart of production. The production processes are full of sensors: we are overloaded with sensor data. We need to use and understand them!

Who is it for?

The CRF Hackathon is dedicated to curious people, to data experts, designers and developers with competences in:

- Analyzing Big and Complex Data (AI, Statistical methods…)
- Developing Big Data representation tools and interfaces (GUI, VR, AR…)
- Developing and implementing Sensors, Architectures and Storage for big Data (IoT, IIoT, CPS…)
- Others? (don’t be shy)

Come in, bring and share new ideas

We are happy to invite you to the CRF Hackathon, which will take place from June 18th, 14:00 to 19th, 13:00 at the WCM Campus Melfi.

The initiative is open to university students, researchers and local companies (SMEs, start-up, innovative).

The event will be an opportunity for you of getting to know the domain experts and obtain new knowledge from the field experts.

Save the date

June 18th, 14:00 > 19th, 13:00

Where to go?

Campus Melfi
FCA Plant (Gate C)
Zona Industriale
San Nicola di Melfi
85025 Melfi (PZ)
